

# INTERNATIONAL® TRUCK FEATURES BENDIX® WINGMAN® FUSION™ DRIVER ASSISTANCE SYSTEM STANDARD ON COMPLETE HEAVY-DUTY LINEUP

---

**LISLE, Ill. (Feb. 13, 2019)** – International Truck now offers Bendix® Wingman® Fusion™, an integration of advanced safety technologies, as standard equipment on the entire lineup of on-highway tractors, including the International® LoneStar®, LT® Series and RH™ Series trucks.

Bendix Wingman Fusion is the Bendix flagship collision mitigation technology integrating radar, camera, and the vehicle's brake system into a driver assistance system that delivers driver alerts and interventions to help them mitigate rear-end collisions, rollovers, and a loss-of-control situations. Wingman Fusion combines and cross-checks information from sensors that are working together – not just in parallel – along with powerful computing, to typically assesses situations faster and reacts earlier, while also helping to significantly reduce false alerts and false interventions.

By creating a highly detailed and accurate data picture, Bendix Wingman Fusion delivers enhanced rear-end collision mitigation, and adaptive cruise control, along with following distance alerts, stationary object alerts, lane departure warning, alerts when speeding, and braking on stationary vehicles – all while prioritizing alerts to help reduce driver distraction. Event-based data – including video – can be wirelessly transmitted for driver coaching and analysis by fleet safety personnel. Other options include blind spot detection that helps drivers address vehicles in their blind spots that may not be visible in their mirrors. The forward-facing camera of Wingman Fusion is powered by the Mobileye System-on-Chip EyeQ processor with state-of-the-art vision algorithms.

“As part of our DriverFirst™ philosophy, we concentrate on consistently improving the overall driver experience, specifically safety,” said Jim Nachtman, director, heavy-duty, Marketing, International Truck. “Partnering with Bendix to make Fusion standard on all of International Truck’s heavy-duty vehicles makes for an important joint contribution to make North American roadways safer for everyone.”

Since the introduction of Bendix Wingman Fusion in 2015, International Truck has offered the technology as an option for all on-highway models. Bendix Wingman Fusion is also available as an option on International’s medium-duty lineup, including the International® MV™ Series, HV™ Series, HX™ Series and CV™ Series trucks.

“Bendix’s ongoing partnership with Navistar is built on years of shared commitment to driver, vehicle, and highway safety,” said Scott Burkhart, Bendix vice president – sales, marketing, and business development. “International Truck’s positioning of Wingman Fusion as standard equipment on its complete line of on-highway tractors is both a point of pride for the entire Bendix team and another step forward alongside a true leader in our industry.”

According to Bendix, its safety technologies complement safe driving practices and are not intended to enable or encourage aggressive driving. No commercial vehicle safety technology replaces a skilled, alert driver exercising safe driving techniques and proactive, comprehensive driver training. Responsibility for the safe operation of the vehicle remains with the driver at all times.
