

Navistar Adding 200 Positions In Fort Wayne

New Strategic Alliances, Organic Growth Creating New Career Opportunities: Additions to be a Mix of Employees and Contractors

FORT WAYNE, Ind. (July 7, 2008) Navistar, Inc., is adding approximately 200 positions at its Truck Engineering Facility in Fort Wayne by the end of calendar 2008. The new positions for degreed professionals in mechanical, electrical, systems and software engineering include a mix of entry-level and management jobs, and contractor positions.

Individuals with experience in automotive engineering areas such as power-train, drive-train, brakes, HVAC, interiors, ergonomics, steering, suspensions, frame systems, harness design, electronics, software development, vehicle dynamics and finite element analysis are especially encouraged to contact Navistar.

The need to add to the existing Fort Wayne talent base of approximately 1,100 employees and contractors stems from Navistar's development of new strategic alliances, growth of existing vehicle programs and future emissions requirements.

In an effort to reach as many qualified individuals as possible, in conjunction with WorkOne Northeast, Navistar will be conducting a job fair on Friday, July 25 at the Troy Marriott Hotel in suburban Detroit. A similar event will take place August 14 at Fort Wayne's Grand Wayne Center, coinciding with the celebration of 100 years of IEEE presence in Fort Wayne.

Individuals interested in learning more about or applying for the available positions should visit www.navistar.com/careers.
