

International Truck to Showcase LoneStar with Cummins ISX15 at Truck World Show

Bold styling and bottom-line performance meets heavy-duty power

TORONTO - (April 10, 2014) - Navistar Canada, Inc. is featuring its International® LoneStar® on-highway tractor with Cummins ISX15 engine this week at the Truck World Show in Toronto. Made available for order in late 2013, the classic-looking LoneStar truck is cousin to the International® ProStar® with Cummins ISX15, which was named the American Truck Dealers (ATD) 2014 Heavy-Duty Commercial Truck of the Year.

“Canadian drivers demand a truck that delivers power and performance, but also offers style, and comfort,” said Mark Belisle, president, Navistar Canada and vice president, regional sales. “The combination of the LoneStar with the Cummins ISX 15-liter power originally made this vehicle a standout in the industry and we are excited to bring it back to the Canadian market.”

In addition to the LoneStar and ProStar, Truck World visitors can also expect to see the International® DuraStar® and International® WorkStar® vocational trucks as well as the ATD 2014 Medium-Duty Commercial Truck of the Year, the International® TerraStar® 4x4.
